

## Product Development Technician

<https://www.ehgroup.ch>

### About EH Group Engineering

EHG is developing its cutting-edge fuel cell technology for both mobile and stationary applications. Our uniquely redesigned product is a significantly more compact fuel cell with high power density. Faced with the challenges of climate change, pollution and the transition to a decentralized energy system, EHG seeks to provide high performance and cost-effective fuel cell solutions to its customers and partners.

The company has been backed by the European Space Agency BIC Switzerland as well as being awarded a major grant from the European Commission as part of the highly competitive Horizon 2020 Accelerator program. With support from long term investors, industrial partners and academia we are working to accelerate the development of our innovative fuel cell technology towards mass commercialisation.

To help achieve our vision of a decarbonized future we are seeking a talented and motivated **Product Development Technician** to join our team.

### Job Profile

**Product Development Technician** to assist the development of various components related to EH Group's innovative hydrogen fuel cell technology.

### Requirements

- Minimum 3-4 years of working experience in a similar environment
- Understanding of overall EH Group technology and concepts
- Practical hands-on experience for troubleshooting tasks related to stack and system assembly
- Highly versatile and handy in finding and proposing solutions for different projects
- Participation of production (rigorous and methodical)
- Categorise, mark and arrange packages/pieces received or to be shipped
- Assist in inventory control and preparation of necessary documents
- Proficiency in MS-Office and similar tools
- Team player with the ability to function autonomously
- Strong communication skills with internal and external customers
- Excellent spoken and written knowledge in English and French is mandatory
- Good written and spoken knowledge German or any other language is a plus
- Experience in using conventional milling, turning machine and other tool is a plus
